VOL 12 NO. 22 | Lancaster Farming, Saturday, April 29, 1967 | $2 Per Year

Corn Products, Funk Seed Co. Merger Planned

An agreement on principle to join the business and property of Funk Bros Seed Co. to Corn Products was announced jointly this week by representatives of the two companies

Speaking for Corn Products was chairman A. N. McFarlane, and for Funk's, company president E. D Funk They placed particular emphasis on two points (1) This joining of forces will mean expanded opportunity for service to agriculture through greater research and service benefits to farmers, (2) the formal joining of forces in the United States is but an expansion of

FFA Tractor Contest Won By York County

Robert Burchett of Red Lion placed first in the Future Farmers of America area tractor contest at Garden Spot High School Thursday with a score of 320 points. Lancaster County entries took second and third placings

Lancaster County vo-ag boys were outnumbered four to two by York Countians in the competition, but Jay Smoker, Clois

CHECKING POULTS ready for shipment at the Ephrata Turkey Farm, Inc., Ephrata R1, are Earl Hertzog, left, and Linford Weaver The boys are employed by the firm as part of a seven-week, agribusiness training program supervised by Lewis Ayers, Ephrata High School agriculture teacher. Both are seniors at the high school. L. F Photo

Ephrata Agribusiness Program Marks Second Successful Year

by Don Timmons

Eight Ephrata High School seniors are busy these spring days getting valuable on-the-job experience under the Agribusiness Training Program launched last year by the high school agriculture department

Ephrata is finding as the Garden Spot High School program did several years ago. that the number of employers willing to cooperate with job training exceeds the number of senior agriculture boys available

Agriculture instructor Lewis Ayers showed real enthusiasm for the program as he guided this reporter on visits to several of his working students this week

"Students enrolled in the program attend regular school classes in the morning and after lunch report to their agribusiness jobs," Ayers explained

The program, which began March 28, will run until May 12 The seven weeks are spent in one continuous employment, but most of the boys interviewed were gaining a wide variety of experience by learning to be useful at anything their employer needed done

OBJECTIVES

The program has been organized to give senior vocational agriculture students the opportunity to gain experience in some type of agriculture business before graduation from high school

"It is our hope," Ayers notes, "that students receiving this type of training will better understand the organization and management of an agriculture business"

STUDENTS

Boys participating in the agribusiness program this year, and their places of employment, are Charles Harting, Agway, Inc , Barry Sensenig, Diffendall Landscape Service; Earl Hert-

Neighbors Lend A Hand With "Spring Plowing"

by Everett Newswanger, Staff Reporter

Newswanger

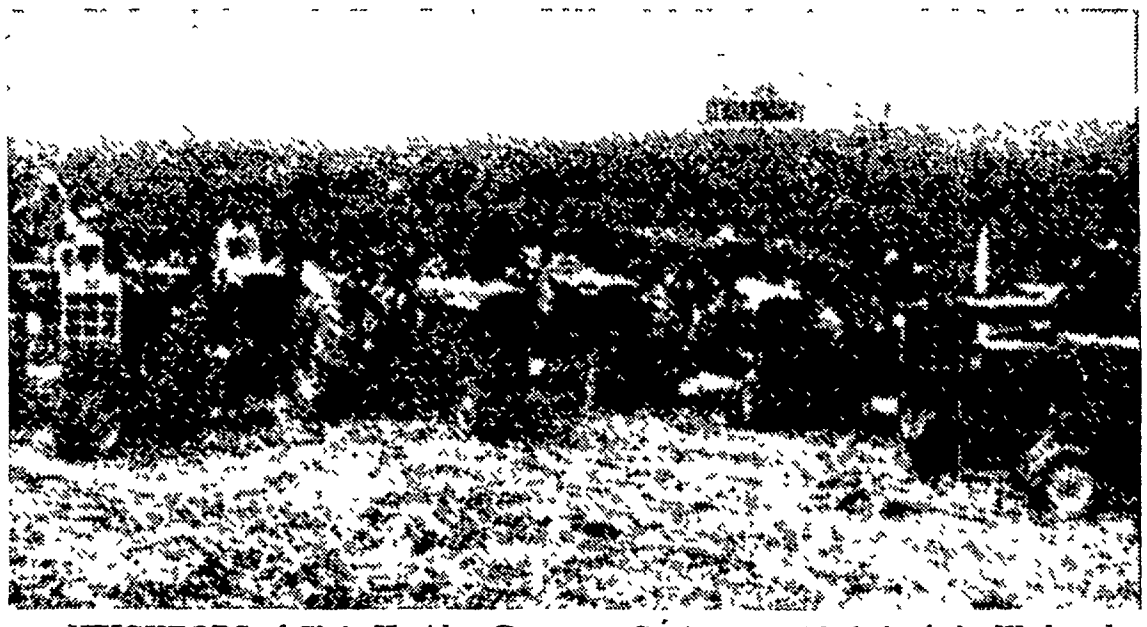
Good, old-fashioned brotherly kindness prevailed in Lancaster County again this week, as furrow after furrow opened and closed on the farm of Clair Kreider, Quarryville R1

Neighbors and friends with 15 tractors and 44 plow bottoms "putt-putted" and "hummed" their way through 50 acres of corn stalks and sod in two-and-a-half hours Wednesday morning, to help a friend just out of the hospital keep up with his spring field work

It all started when James Kreider, Quarryville R1, president of the Men's Work Project Committee of the Mechanics Grove Church Of The Brethren, "called around" to get some men with tractors together to plow for Clair. And plow they did — tractors of various sizes each pulling its favorite plow Nine hundred and sixty horse power in all, busting the way around the gently curving contours "Almost everyone that we called came," James said

In discussing this friendly act of his neighbors, Clair Kreider said "I certainly do appreciate all they are doing

(Continued on Page 9)



NEIGHBORS of Clair Kreider, Drumore Center, provided the help Wednesday teen men and tractors plowed 50 acres in to keep up with his spring field work. Fifteen men and tractors ployed 50 acres in two-and-a-half-hours as a Church work project. L. F. Photo

Grain Stocks Adequate, Freeman Says; No Change In '67 Diversion

Secretary of Agriculture Orville L Freeman said Tuesday that no change will be made in the acreage diversion provisions of the 1967 feed grain program

He announced continuation of the program in answer to inquiries since the intentions-to-plant report and the program signup reports showed that Farmers may not plant as much acreage to feed grains as had previously been anticipated, and in response to demands by industry representatives that feed grain acreage and supplies be further increased

"Recent reports on crop and moisture conditions, farmers' planting intentions, and stocks of grain on farms indicated that feed grain production will be adequate to

First Major Hog State Rated Cholera-Free

Michigan is the first major hog-producing state to be declared free of hog cholera, the US Department of Agriculture announced recently

It is also the seventh state to be officially named "hog cholera free" Previously, Vermont, Nevada, Utah, Montana, Alaska, and Idaho were declared free of this costly swine disease.

A certificate signed by Secretary of Agriculture Orville L Freeman, recognizing Michigan's achievement in the cooperative state-federal campaign to eradicate hog cholera, was presented to B Dale Ball, director of the Michigan Department of Agriculture

Michigan produces over a million hogs annually and ranks among the top third of the states in hog production. Its success in the fight against hog cholera a real accomplishment, it was noted.

Michigan achieved hog cholera-free status by systematically completing all the procedures called for in the four-phase eradication program Each phase represents a build-up in a state's fight against hog cholera until the disease is wiped out.

Degrees Conferred At Fulton Grange Meeting

Fulton Grange #66 held its regular meeting April 24 and conferred First and Second Degrees upon twenty-six people The membership contest, having ended in a tie, was extended until June 26

The Grange went on record opposing House Bill 333 in the State Legislature which would permit Sunday sales to anyone observing the Sabbath on any other day. This bill has passed the House but has not been acted upon by the Senate

Everyone was also urged to vote against the revision of the State Constitution on the grounds that it represents a loss of local control of government

Degree rehearsal was set for May 2, at 8 p m Third and Fourth Degrees will be conferred at the next meeting, May 8, and a scrap drive will be conducted for the benefit of Boy Scout Troop 330

NFU Blasts "Instant Credit"

"Deceptive consumer credit practices have contributed to the high interest rates" said Ed Smith, chairman of the board of National Farmers Union, before a Senate Banking and Currency Subcommittee today Smith called upon Senator Proxmire and the committee to report out the Truth in Lending Bill quickly as a part of the effort to reduce interest rates Smith, who has headed the farmers Stop Buying Campaign said that part of the $2 5 billion of interest paid by farmers last year was due to this "deceptive usuary" under the label of installment buying, revolving credit cards, car and farm implement loans and other forms of "instant credit"

"Farmers can't get farm loans at 6 or 7% if the banks can lend that money at higher interest rates to finance companies, car and implement dealers, department stores, or other consumer loan sources who lend it out for 18 or 24% or more", said Smith

"Each year an additional $7 billion is diverted from conventional lending institutions into the higher priced consumer loans This tends to increase the interest on school bonds and government bonds, too" he said

Smith, who is also the President of the North Dakota Farmers Union, told the committee that "unless something is done to improve farm income and cut interest rates and farm costs, there will continue to be rebellion in the countryside"

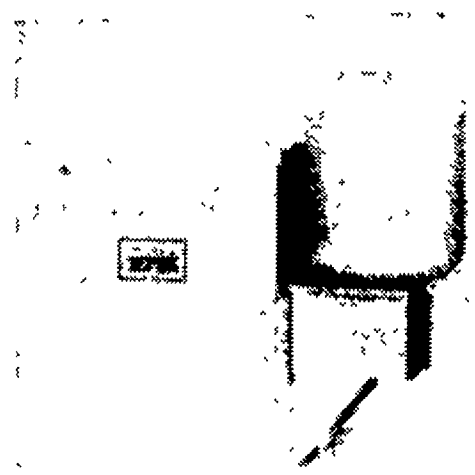
AT LAST



An Accurate and Dependable Proportioner and Much More

Healthway

OFFERS YOU A TRULY REVOLUTIONARY MACHINE AND METHOD FOR

Proportioning medications, vitamins. and other water additives . . . . . Accurate at 1/10 oz. to 1 oz. per gal. — 1 to 250 G. P. H.

FOR POULTRY & LIVESTOCK

Exclusive Healthway Features

1. Made from costly stainless steel for life-time service
2. Proportions 1/10-1/5 or 1 oz. per gallon
3. Accurately proportions any water soluble additive
4. Water and medicine are thoroughly mixed by mechanical means
5. No hidden close fitting pistons to slow down or stop

HEALTHWAY ALSO OFFERS A STAINLESS STEEL WATERER OF REVOLUTIONARY DESIGN AND PERFORMANCE

WET FLOORS ELIMINATED

Healthway Waterers are universal in that they may be used for baby chicks, broilers or fully grown fowl! Because of the "magic of the circle" one Healthway Waterer has been found sufficient for 200 or more laying hens and easily replaces a six or eight foot trough in the brooder house.

From Where We Stand . . .

World Famine By 1975?

We note more and more concern from some quarters on the worsening world food-population crisis. Comments range from the usual "surplus and overproduction" lament to "cannibalism in the space age".

Secretary of Agriculture Orville L. Freeman told midwest farm groups last week, the factor that has changed the rosy farm picture of a few months ago is the same old problem — over-production. He said that Russia and Australia had bumper crops of grain last year, and that this cut into our exports.

Meanwhile, back at the Washington ranch, the USDA's April Feed Situation report shows the feed grain reserve by October 1st will be about one-half of the 40-50 million ton-level USDA has called safe It seems farmers signed up to divert several million more acres from feed grain production than USDA had hoped

Neither of these official statements and reports are going to do much to cheer the U S -should-feed-the-world advocates In fact, there seems to be an increasing awareness that we are not equal to that task

A review of an upcoming book called "Famine — 1975'" suggests that time has already run out That there is no longer any question of our being able to stop the inevitable course of famine It reportedly maintains that our only decision now is who will live and who will die? Which of the developing countries should we help, and which should we forsake? The reviewer credits the authors with the theory that India, now the greatest recipient of U.S. aid, is beyond saving, and should be abandoned to help countries that are more strategically important and salvable.

Another organization concerned with world food problems — the Food and Agriculture Organization (FAO) of the United Nations — quoted several authorities this week to the effect that an upsurge of cannibalism could be the product of impending famine.

FAO quotes Dr. Frank Laubach, president of Laubach Literacy, Inc. Speaking of peoples in the famine-threatened countries who are dying from starvation at the rate of 10,000 persons a day, Laubach said "they're frightening, and they're dangerous because they are desperate".

Laubach adds that these people, for the most part, are illiterate, and are hungry because they are ignorant. They have no concept of modern agriculture.

ANSWER IS YOUTH

A farm machinery manufacturer, Massey-Ferguson, believes as Laubach does, that the answer is education. The company is providing financial support for an FAO program called the "Young World Food and Development Project".

Realizing that the effort to change adult farming habits in those underdeveloped countries is useless, the program emphasizes education of future farmers. The YWFD is designed to work through rural youth movements in more than 60 developing countries. It is hoped that over the next 15 years the size and scope of youth programs can be doubled. During that time, it is estimated, more than 30 million young people will have been actively involved

Who is right and who is wrong on this question? It is not an easy thing to say that it is too late for billions of people in dozens of countries. If the time comes when such a decision has to be made, we feel certain it will not be made lightly

In the meantime, it is reassuring to know that efforts are being extended through the United Nations, and supported by American industry, to teach the future farmers in these under-developed countries sound farming principles.

As for the federal government's role in agriculture, it looks like it will go in one of two directions — direct subsidies underwriting food production, or, out of the farm program business altogether. There appears to be strong official support for both of these moves, and worsening food conditions could hasten either action.

MANOR FFA CHAPTER OFFICERS elected recently are from left (front row) Richard Rohrer, treasurer; Barry Acker, vice president; Clair Erb, president; and Nelson Newcomer, secretary, (back row) Garland E Gingerich, agriculture teacher, Bruce Frey, sentinel, Abe Fisher, reporter; and Dan Ditzler, chaplain.

C. Erb Named President Manor FFA Chapter

At a recent meeting of the Manor Chapter Future Farmers of America, officers were elected for 1967-68 Named chapter president was Clair Erb, a junior at Penn Manor High School. He is the son of Mr and Mrs Daniel Erb of Columbia R2

Other officers elected were vice president, Barry Acker, Willow Street R1, secretary, Nelson Newcomer, Washington Boro R1 treasurer, Richard Rohrer, Lancaster R2; reporter, Abe Fisher, Lancaster R2 sentinel, Bruce Frey, Millersville R1, and chaplain, Dan Ditzler, Millersville

Members also elected the following committee chairmen general committee, John Martin public relations, Claude Miller community service, Leroy Eshleman, recreation, Ken Nissley leadership, Dave Kilheffer conduct of meetings, John Best cooperative activities Larry Hamish and supervised farming Dave Hoover

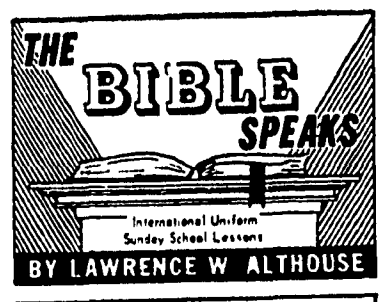
The idea of raising taxes to halt inflation goes back to the Fall of Rome. It worked there



Something to Explain

Lesson for April 30, 1967

Background Scripture Acts 4 1 22
Devotional Reading Romans 10 8 17.

In the early chapters of Acts there are a number of passages that are often referred to as the "sermons of Peter." This, however, is a misnomer, for these utterances are nothing like what we know today as "sermon." They are not planned or even anticipated by Peter. In fact, it is apparent in these chapters that the early church had no strategy or program at all for communicating the gospel and winning converts. No one prepared himself for street-corner sermons or public debates. How then do we explain these "sermons" of Peter?

Rev. Althouse

When we study these "sermons", we discover that each time Peter 'preaches" it is not a planned speaking occasion, but an attempt to answer an urgent question. On the first such occasion, the day of Pentecost, people witnessed the power of the Holy Spirit working mightily in the lives of the followers of the Nazarene. "What does this mean?" they wanted to know. What is commonly called "Peter's first sermon," then, is simply an answer, an attempt to explain "What's going on here?"

We see this same pattern again at the gate of the temple (Acts 3). An astonished crowd wants to know how Peter and John were able to heal the crippled beggar. Again, Peter attempts to explain: "Men of Israel, why do you wonder at this . . . ?

Once more in Acts 4 we find that another of Peter's "sermons" is — simply an attempt to answer a question. "By what power or by what name did you do this?" Once more people want to know "What's going on here?" Once more Peter can give the same answer: "Jesus Christ!" "Be it known to you all . . . that by the name of Jesus Christ of Nazareth . . . this man is standing before you well" (Acts 4:10 RVS).

All They Had

In each circumstance the little band of disciples had been channels of God's power. People witnessed this power and, amazed, could not help asking, "What's going on here?" Thus, the earliest "sermons," the earliest attempts to witness for Christ, were simply attempts to answer a question and explain the presence of the Holy Spirit.

Perhaps then, our problem in evangelism today, in communicating the gospel, is not so much a lack of zeal, of cleverness, or expertise in either theology or communication, but the absence of the Spirit from our lives. Often we are in the position of giving Peter's answer to "What's going on here?" to people who aren't asking the question because they don't see anything "going on." We are witnessing for a power with which it seems we are not personally acquainted.

This was the only thing the primitive church had. It had no lofty theology or philosophy to attract those who were shopping for some new idea. It had no mysterious ritual to draw the curious. These people lacked education, culture, training, money, power, and influence. By themselves there were a most unimpressive lot. Yet, it became evident that they did "have something." That "something" was God's power shining through those otherwise-unimpressive lives.

Nothing So Compelling

There is nothing so compelling today as a life in which the power of God is evident. That power may, but need not, be spectacular. The style of one's life may be just as impressive as a striking gift. The important thing is that we have something to explain, something to inspire those questions: "How did you give up the bottle?" "How do you stand a job like that?" "Why are you always so cheerful?" "What makes you so trustful?" "You're a different person: how come?"

Today, as in the beginning of the church, we need not compose sermons in order to witness. All that is required of us is that we have an answer when someone wants to know: "What's going on here?" The answer, of course, however we say it, is "Jesus Christ!"

Do you have something to explain?

SMITH

To Ensile Winter Rye

Livestock producers who are planning to make silage from winter rye should try to get the crop harvested in the late boot to heading stage, this is at an earlier stage of maturity than the other small grains in order to get improved palatability most winter grains are at the peak of feeding value in the flowering (blossom) stage Some feed additive ensiled with the winter grain silage will improve the feed value

To Control Weeds In Alfalfa

Growers who made a straight alfalfa seeding earlier this spring, and did not use Eptam before seeding are urged to spray the field with 2,4-D B when the small weeds are 1 to 2 inches high Spring seedings without oats as a nurse crop, must be sprayed for weed control either before or after the alfalfa seeding Even though the stand of weeds appear scant when the above height, the spray should be applied when the weeds get larger and begin to crowd out the alfalfa, then it is too late to control them easily

To Plant Silage Corn Thicker

Corn plants per acre are on the upward trend on most farms to get a larger yield some growers are planting with less distance between rows and some are planting thicker on the standard width of row This is a controversial subject, and it is the opinion that most growers can increase yields with improved cultural practices without going to the extremely narrow rows Also, since so much emphasis is being placed on corn silage these days, it is strongly advised to plant corn for silage at least four to five thousand plants per acre thicker than for grain purposes

meet our needs," Freeman stated.

The secretary said that his tentative decision not to change the 1967 feed grain diversion program was supported by a large majority of the farmers attending meetings in the mid-west last week.

Feed grain stocks are larger than anticipated and it is now expected that year-end carry-over stocks will be higher than the 25 million tons previously estimated, he added.

Feed grain prices received by farmers between October and March averaged 13 percent higher than a year earlier. Corn during that period averaged $1.28 a bushel—14 cents more than last year and about 30 cents a bushel above the post-war low of 1960-61, it was noted.

● Tractor Contest

(Continued from Page 1)

ter Chapter, captured second place with 428 points, and Ken Weber of Grasslands took third with 540 points.

Other placings: 4, Wayne Sweitzer, Dallastown; 5, Daniel McElwain, Kennard-Dale; and 6, Silas Kneller, Southwestern.

The contest was divided into five sections: tractor driving which included operating with a two-wheel spreader, and operating with a four-wheel wagon; written exam; trouble shooting practice; identification of parts; and evaluation of maintenance records kept for the past year by the contestants.

Judges for the contest were: Trooper Edwin Grazer, Lancaster Barracks; Gene Rahll, New Holland Co.; and Marvin Zimmerman of East Earl R1, Lancaster County plowing champion.

Equipment was loaned by ABC Groff; C. B. Hoober & Son; Allen H. Matz, Inc; and Walter Clair Martin.

Teachers helping to grade the contestants were: Robert Herr, Charles Ackley, and Paul Ludwig.

The FFA Grassland Chapter members helped set up the course and assisted the judges with measurements

Alfalfa weevil: what you should know to control it.

When is the best time to spray? Inspect your alfalfa twice a week, starting in early spring. Larvae are not easy to spot. So look closely, and check different areas of the field.

When 3-5 out of 10 plants show signs of larvae feeding in the bud tips, spray immediately with 2-3 qts. of Alfa-tox® per acre. Use twice as many gallons of water per acre in your tank mix as the height of the alfalfa in inches. But don't use less than 10 gals. or more than 40 gals. of water.

If you have an infestation at the time of first cutting, spray stubble immediately after harvest This will prevent damage to the second crop.

Continue to check alfalfa through the season for possible infestations and spray before the situation becomes serious.

How long is the control good for? Control of alfalfa weevil with Alfa-tox is effective for 2-3 weeks. This may be reduced, however, if it rains shortly after spraying. So continue to check your fields frequently and spray again with Alfa-tox if you detect a reinfestation of weevils.

With Alfa-tox, all you have to do is wait just seven days after spraying before you pasture your crop or cut it for hay or green forage Then you will be sure of no insecticide residue in milk.

How can you decide which insecticide to use? Several insecticides may be used. But Alfa-tox is specially formulated to control alfalfa weevil and just about every other insect known to attack alfalfa. It's a combination of Diazinon® and methoxychlor.

Alfa-tox is effective even under low temperatures, and control lasts for 2-3 weeks. Another benefit is that the waiting period from spraying until harvest to avoid milk residue is only seven days.

The liquid formulation of Alfa-tox is easy to apply Farmers have no difficulty working with it because special clothing or protective devices are not needed. Simply follow label directions. See your supplier today for Alfa-tox.

Don't plant for the BIRDS!

See us now for **ORTHO Bird Repellent**

Crows, blackbirds, pheasants — any bird that steals seed won't come back a second time for seed treated with ORTHO Bird Repellent. They spit it out and fly away. It's easy to get this kind of protection for your seed. All you do is pour this repellent right in with the seed in your planter box.

Actually, you're getting more than bird protection with this product. The full name is ORTHO Bird Repellent and Seed Protectant. It also contains an insecticide to control soil insects such as wireworms, seed corn maggots and corn rootworm. And a fungicide for extra protection against diseases like seedling blight, damp-off, and seed decay.

This is the only bird repellent that combines all these protections. So this year, don't plant for the birds. When you get your seed, ask us for ORTHO Bird Repellent.

Retail Milk Price May Increase To Match Fluid Raise, I-S Says

An increase in the farm price for fluid milk of 1.5 cents per quart, announced by the U.S. Department of Agriculture, may result in a consumer price increase of from 1½ cents to 2 cents per quart. This farm price will increase from 12.9 cents to 14 3 cents per quart starting May 1, 1967. This prediction was made by Dr. Paul E. Hand, economist for Inter-State Milk Producers' Cooperative, representing farmers in the Philadelphia area.

The increase in farm price came as the result of a hearing held in Washington, D.C., April 14-15, at which time area farmers requested from 1 cent per quart to 2½ cents per quart increase. Milk farmers will not receive this increase for all milk produced because a portion of milk sold is used for manufacturing purposes. Farmers receive only 9 cents per quart for the milk used for manufacturing.

F. Bennett Carter, president of Inter-State Milk Producers' Cooperative, and Hand attended the federal hearing and testified in behalf of the milk farmers, who are members of Inter-State, shipping milk into Philadelphia, Baltimore and New York markets

Hand presented testimony requesting an increase in the price of milk because milk farmers have been in a price squeeze of high production costs and an acute labor shortage Increases in farm costs have forced many dairymen to "sell out" of the dairy business.

Prior to the announcement of this decision, the USDA released an order recommending a change from the individual handler pooling to a marketwide pooling for the Delaware Valley (Philadelphia, Wilmington and South Jersey) metropolitan area.

As a result of this change recommended by the Department, dairy farmers supplying this area were forced to go to a hearing to request additional income by way of a higher price for their milk

Inter-State represents 3300 dairy farmers in Pennsylvania, New Jersey, Delaware, Maryland, Virginia and West Virginia.

Lanchester Pony Club

An unmounted meeting of the Lanchester Pony Club was held April 23 at the Solanco High School with 32 members and many parents attending. Final plans for the May 6th open horse show were made.

It was reported more than 200 entries had been received for the show to date. Rings have been put up at the Quarryville Community Grounds in preparation for the show, and members will paint the jumps on Sunday, April 30th. The children also received a lesson on preparing for a horse show and a demonstration on pulling mane and braiding

The club announced that four members had made the "D" rating on their riding They are: Jon Gibson, John Weir, Jr., Mary Ann Wate s and Judy Ann Higginbothan.

The Club had nine "D's' participating in a one-day rally hosted by the Berks Pony Club in Reading Of the 35 "D" riders, representing four area clubs, one of the local members, Debbie Weir of Oxford, placed second.

The national headquarters recently reported that pony clubs are the largest organization of riders in the world with nearly 75,000 members in 22 countries. In the U S., there are nearly 7,000 riders in 156 clubs. These are grouped into 18 regions, 33 states, and one territory.

The purpose of the clubs is to encourage young people to ride and to learn to enjoy all kinds of sport connected with horses; to provide instruction in horsemanship and the proper care of animals; and to promote high ideals of sportsmanship, citizenship, and loyalty.

Super Q
starts corn fast.
Grows a vigorous,
early stand,
supplies
root-tip
availability!

If a strong, vigorous stand of corn is what you expect from a corn starter, Super Q is made for you!

Super Q *does* get corn off to a *faster* start, but it's a *better* start too. Why? Because Super Q is a top quality starter. Its special, localized formula gives better, stronger germination because it doesn't damage seed. And Super Q supplies plenty of water-soluble phosphate to grow a strong, vigorous stand of corn. Super Q pushes young corn up and leafs it out to shade the ground, and conserve vital soil moisture, help control weeds. That's a fast start. A better start.

Super Q's combination of secondary and micro-elements continues to feed hungry corn until the maturing root system has literally outgrown the starter zone and is being fed by plowdown and nitrogen.

Start your corn off toward top profits with Super Q. It's available exclusively at our Q-Center. Let us show you how Super Q plays an important part in our Q-Plan, a complete quality crop production program designed to boost profits as it builds your soil!

4-H NEWS

LAMPETER-STRASBURG CLUB REORGANIZES

by Joyce Groff, reporter

The reorganization meeting of the Lampeter-Strasburg 4-H Club was held on April 15 at the home of Mrs. J Robert Hess, Strasburg R1. The following officers were elected

President, Marilyn Krantz, vice president, Cindy Hess, secretary, Beverly Byers, treasurer, Donna Welk; song leader, Carol Byers; game leaders, Debbie Hess and Debbie Wiker, news reporter, Joyce Groff

Debbie Hess and JoAnn Metzler, and Cindy Hess and Therasa Brotzman will team up in presenting demonstrations at the next meeting

In discussing projects, members decided to have two groups Cooking (It's Fun Bake), and Room Improvement.

The next meeting will be held June 20, at 9:30 a.m., at the Lampeter-Strasburg High School.

Club leaders for this year are: Mrs J Robert Hess; Mrs Richard Hess, Strasburg R1; and Mrs Robert C Groff, Quarryville R3.

KIRKWOOD 4-H CLUB ORGANIZED FOR 1967

by Ann Walton, reporter

The Kirkwood Community 4-H Club was organized on April 17, at the Bart-Colerain Elementary School.

Approximately twenty members attended the meeting, over half of them new to 4-H Club work.

Winthrop Merriam, associate county agent, explained to the new members the history and reasons behind 4-H.

Dorothy Walton was elected president with Hugh Wenger serving as vice president Other officers elected were secretary, Teresa Walton; treasurer, Sandy Walton; and club reporter, Ann Walton.

Tim Mills; game leaders, Sandy Farmer, Donna Blantz, and

The next meeting will be held on May 2, at 7:30 in the Bart-Colerain Elementary School.

High capacity and low maintenance win fame for Allis-Chalmers C[II] Gleaner combine!

Down-front cylinder leaves room in the thresher body for *49 square feet* of separating area! That's *capacity* that puts more and cleaner grain in the bin. *Low upkeep* begins with the heaviest main frame in the industry, balanced weight distribution and the full-jewelled smoothness of running parts. New variable-speed cylinder control lets you set RPM's to match crop conditions. Easily switched to regular or *narrow* 4-row corn head!

Crop Roundup

ALL PA. GRAIN STOCKS TOTAL 33% UNDER 1966

Stocks of all grains in the Keystone State, on April 1, were 33 percent less than a year earlier, according to the Pennsylvania Crop Reporting Service The stocks of corn at 20.9 million bushels, were primarily responsible for this decline being 39 percent less than a year ago **Wheat** stocks declined by 21 percent from last year. Off-farm stocks declined by 31 percent, contrasted with an increase of nine percent for wheat on farms **Oat** stocks were 28 percent below a year earlier, due primarily to a decline in the on-farm stocks **Barley** stocks showed a net increase of 10 percent

SOYBEAN STOCKS LARGER; FEED GRAINS OFF 10%

Stocks of the four feed grains in the United States on April 1 1967 totaled 103 million tons —10 percent less than a year earlier and 19 percent below average Record high April 1 soybean stocks were 22 per cent more than on last April 1 and more than one-third above average Stocks of wheat were 23 percent below a year earlier Durum holdings down 45 percent Although down two percent from April 1, 1966 rye stocks were the second largest since April 1, 1944 Stocks of flaxseed were down 29 percent from a year earlier but 11 percent above average

WHEAT

All wheat in storage on April 1 totaled 703 million bushels, 23 percent less than a year earlier and the smallest for the date since 1952 Off-farm holdings were 462 million bushels 30 percent below last year and farm holdings of 241 million bushels were 6 percent less Disappearance from all positions during the January-March quarter is indicated at 346 million bushels compared with 419 million bushels a year earlier

CORN

Corn stocks of 2 704 million bushels in all positions on April 1 were 6 percent less than a year earlier and 17 percent below average Current holdings indicate a disappearance of 959 million bushels during the January-March quarter compared with record high of 1,178 million bushels for the year-earlier quarter

OAT

Oat stocks of 441 million bushels in all positions on April 1 were 18 percent below a year earlier and 12 percent below average Farm holdings of 354 million bushels were 21 percent below a year earlier and equaled 80 percent of total April 1 stocks Off farm stocks, at 88 million bushels, were up slightly from a year earlier Disappearance during the January March quarter of 219 million bushels compared with 227 million bushels a year earlier

BARLEY

Barley stored in all positions on April 1 totaled 206 million bushels, about seven percent more than a year earlier but eight percent below average Off farm stocks at 92 million bushels, were slightly below April 1 1966 Farm stocks of 114 million bushels are about 15 percent above a year earlier Disappearance during the January March quarter was 86 million bushels compared with 108 million bushels a year earlier.

Let's Not Give All The Credit To The Feed!

Performance and Low Cost Egg Production

RESULTS FROM A COMBINATION OF

- **Excellent Breeding,**
- **Housing of a good healthy pullet,**
- **Top flight management on the part of the producer, and**
- **A feeding program fitted to get Optimum Performance from the birds.**

Feed alone won't do it, but . . . your chances are better with THE EARLY BIRD LINE.

Here's Proof:

Among the eleven producers in our delivery area recently honored by a national organization for outstanding egg production,

FIVE are users of Early Bird Feeds and Service,

FOUR competing feeds shared honors with the remainder.

Among the Five Early Bird Users:

- **Production for 14 twenty-eight day periods ranged from 242 to 278 eggs per hen housed.**
- **Livability ranged from a low of 84.4% to a high of 94.6%.**
- **Conversions ranged from 3.69 lbs. of feed per dozen eggs in cages to 3.78 lbs. on slats.**

One producer kept his hens beyond the 14 periods and had 318.6 eggs per hen housed in 485 days of production.

You'll like the results you get from Early Bird Feeds.

Deer Should Be Legal Deductions For Farmers

HARRISBURG — Farmers should be able to claim deer as dependents when they file their income tax, Pennsylvania's Secretary of Agriculture believes.

Leland H Bull said this would be one way the farmer would be compensated for the damages deer do to crops each year

"My statement about claiming deer as dependents may sound ridiculous," Bull said, "but I make it to emphasize the tremendous losses farmers suffer in areas over-populated with deer."

(Continued on Page 18)

Poultry Technician Course Set July 17-20

HARRISBURG — The Pennsylvania Department of Agriculture has announced that applications will be received until July 1 for enrollment in the sixth poultry technician training course for qualified laymen, July 17 through 20, at the Penn State University.

Application blanks are available from the Bureau of Animal Industry in Harrisburg Each application must be accompanied by a check or money order for $5 payable to the Commonwealth of Pennsylvania. This fee will be returned if the applicant is not accepted for training or if he fails to qualify for a license An applicant must be 21, a citizen of the United States (or legally declared his intention to become a citizen), of good moral character, and have completed at least eight years of education or its equivalent.

The class will be limited to approximately 15 trainees Satisfactory completion of the course leads to issuance of a license as a poultry technician. This permits the licensee to engage in the drawing of blood samples from chickens and other fowl to be used in the state's pullorum disease testing program, supplementing the work of veterinarians. The technician, however, is prohibited from performing any other function requiring a veterinarian's license

Those who really want to do something find a way others find excuses.

River Basin Compact Stacked Against Pa., PFA Director Says

"The people of Pennsylvania should request their members of the General Assembly to thoroughly study and understand the proposed compact for the Susquehanna River Basin", said Franklin White of Muncy, Pennsylvania, a member of the board of directors of the Pennsylvania Farmers' Association, today

"What kind of a one-way contract is our Legislature getting us into that permits the federal government to withdraw and set its conditions for membership while the other parties, New York, Maryland, and Pennsylvania are prohibited from withdrawing?" asked White.

Referring specifically to Article I of Senate Bill 479, introduced by State Senator Zehnder Confair of Williamsport, White pointed out that of the four parties to the compact, only the federal government has the right to withdraw as a party to the compact Congress is also given a free hand to revise the terms and conditions under which it may remain a party to the compact.

"Congress may decide," said White, "not to pay its share of the costs as a condition to remain a party to the compact. Or, Congress may come up with some adverse ideas 30 years from now that seriously affect Pennsylvania And Pennsylvania would be stuck"

"Of all business dealings I know of, my bank would have been out of business a long time ago if it had permitted the farmers in my area to borrow money on the condition that the farmers could withdraw from the loan agreement, or set their own terms of payment"

Attending a statewide meeting of over 120 county Farmers' Association voting delegates at the Chalet Restaurant,

Grassy Weeds Stealing
Your Corn Profits?

HIRE A KILLER!

RAMROD®

Nothing can steal profits from your corn crop quite like grassy weeds . . . especially giant foxtail and other foxtails. Where these pests grow uncontrolled, corn yields are sure to drop. This year, don't let it happen to you. Hire a killer . . . Ramrod, the remarkable new pre-emergence herbicide developed by Monsanto Company to control grassy weeds before they start . . . without harm to corn, and without chemical carryover in the soil to wreck your crop rotation plans. Ramrod, the careful killer, stops grassy weeds during the early stage of crop growth when weed competition has its worst effect on yields. Then Ramrod disappears, leaving your fields clear of weeds and chemical. All you get is more money in your pocket at harvest. Talk to us today about Ramrod . . . best friend your corn ever had!

For the Farm Wife and Family

By Mrs. Richard C. Spence, Food Editor

The Salad's The Thing!

SPENCE

Cold, fresh and crisp are the key words for tasty salads, unless, of course, they are meant to be served hot like German potato salad or some sort of hot slaw. Salads are becoming more and more important in meal planning because they taste good, add color and are nutritious Salads are good the year around for the texture they add to meals, especially a green salad

Practically all salads start with greens, whether mixed together or used as a bed for other types of salads Uncooked vegetable leaves make a refreshing salad or salad bed Spinach, kale, celery leaves, beet and turnip tops Swiss chard and dandelion greens are rich in vitamins and add a zesty tang

With the variety of leafy vegetables and other vegetables on the market today, there is no such thing as an ordinary salad All greens have a personality of their own This might be crispness like iceberg lettuce or tenderness like bibb lettuce Romaine and leaf lettuce add distinctive flavor, spinach adds a dark green color and escarole the light green color Curly endive adds an interesting design in the combination of salad greens

You can combine any number of vegetable greens to make a salad, they are considered suitable as long as they are attractive in color and are palatable in flavor. A good rule to follow is mix stronger flavored greens with mild flavored ones, shades of light and dark green together, and smooth, crisp leaves with crinkly, curled ones.

Originally, the term "salad" was a dish prepared from raw greens simply dressed with oil and seasoning. This might still be called a true salad. But today, a salad is described as any food or mixture of foods garnished with a green salad vegetable and served with a dressing.

Some salad tossers feel that vegetables like tomato, onion, cucumber, carrot or celery should be eaten from a relish tray. Others feel these colorful, chopped vegetables add much to the enjoyment of the salad.

Whatever the combination of foods, fresh salads lend themselves in as many ways as the imagination can create dishes to serve Salads are also easy to prepare.

Remember to fit the salad to the meal For a hearty meal, serve a light salad and for a light meal, serve a hearty salad To retain salad freshness, keep greens well chilled before preparing and keep the salad chilled before serving.

ORANGE-BANANA SALAD WITH FRESH CITRUS DRESSING

3 large oranges, peeled
2 large bananas
Fresh Citrus Dressing"
Salad greens
½ cup chopped pecans or walnuts
3 tablespoons chopped watercress or parsley

Slice peeled oranges into cartwheels. Peel bananas; slice in half lengthwise then cut into 2-inch pieces Marinate orange and banana slices in Fresh Citrus Dressing for at least 30 minutes Arrange marinated fruit slices on crisp salad greens Sprinkle with chopped pecans and watercress. Serve with remaining marinade

FRESH CITRUS DRESSING

¼ cup orange juice
¼ cup lemon juice
½ cup salad oil
¼ cup sugar
1 teaspoon salt
1 teaspoon paprika
1 teaspoon prepared mustard
½ teaspoon celery seed
¼ teaspoon pepper
1 teaspoon grated onion

Combine ingredients and blend well with rotary beater or shake well in tightly covered jar. (Makes about 1 cup dressing.)

FRESH ORANGE AND CRAB SALAD WITH TART HONEY DRESSING

Tart Honey Dressing*
3 large oranges
2 large ripe avocados
Lemon juice
2 7½-oz. cans crab meat, chilled
Salad greens

Prepare Tart Honey Dressing as directed below; chill. Peel and section oranges; drain. Peel avocados and cut into lengthwise slices; dip in lemon juice. Break crab meat into bite-size pieces. Arrange orange sections and avocado slices on individual beds of crisp salad greens; top with crab meat. Serve chilled with Tart Honey Dressing.

TART HONEY DRESSING

½ cup water
½ cup honey
½ teaspoon ground cardamon
1 teaspoon fresh or dry mint leaves, crushed
1 teaspoon grated lemon peel
¼ cup fresh lemon juice
¼ cup salad oil

Two important things when borrowing money

You need a sharp pencil plus the specialized financial advice of Farm Credit to determine how your financial needs can best be served. Farm production must be maintained, even increased if possible. Providing the financing to insure this is Farm Credit's job. Farm Credit loans are available now for any sound farm need. And, at realistic rates. Farm Credit interest is based on the unpaid balance of the loan. That saves you money.

Farm Credit

● For The Farm Wife

(Continued from Page 14)

⅛ teaspoon salt

In saucepan combine water, honey and cardamon; simmer 3 to 5 minutes. Pour over crushed mint; chill until cool. Strain into covered jar Add remaining ingredients; shake until blended. Chill before serving.

If you're looking for a main dish salad that can be made several hours before serving time, tightly covered with foil or plastic film and refrigerated until served, try this one.

FLORIDA SALAD PLATTER

- 4 cups diced cooked chicken, shrimp or lobster
- 2 cups diced celery
- ¼ cup pimiento
- ¼ cup diced green pepper
- 1½ teaspoons salt
- 1 cup mayonnaise or cooked salad dressing
- 4 cups grapefruit sections
- Tomato aspic ring

Section fresh grapefruit, or use canned sections. Lightly mix together chicken, shrimp or lobster, celery, pimiento, green pepper, salt, mayonnaise, and 1½ cups grapefruit sections. Turn out tomato aspic ring on a large chop plate, fill center with chicken salad, and garnish outside of ring with remaining grapefruit sections and crisp salad greens. Makes 12 to 14 servings.

TOMATO ASPIC RING

- 2 tablespoons unflavored gelatin
- 2 cups grapefruit juice
- Dash cayenne
- 1½ cups canned condensed tomato soup
- ½ teaspoon salt
- 1 teaspoon celery salt

Soften gelatin in ½ cup grapefruit juice for 5 minutes Place over hot water to melt, add gelatin to juice and stir until dissolved. Add soup, salt and celery salt. Mix and turn into a 2-quart ring mold; chill in refrigerator until set.

(Editor's note: We goofed last week—as you probably noticed. Some of Mrs. Spence's good cookie recipes were accidentally omitted. These are included below.)

APPLESAUCE-RAISIN DROP COOKIE

- ½ cup fat
- 1 cup sugar
- 1 egg
- 1¾ cups sifted flour
- ½ teaspoon baking powder
- 1 teaspoon baking soda
- ½ teaspoon salt
- 1 teaspoon cinnamon
- ½ teaspoon cloves
- ½ teaspoon nutmeg
- ½ cup seedless raisins
- 1 cup quick-cooking rolled oats
- 1 cup applesauce

Cream together fat and sugar; stir in the egg. Sift together flour, baking powder, baking soda, salt, cinnamon, cloves, nutmeg Mix in raisins and rolled oats Add to creamed mixture in three portions alternately with applesauce in two portions. Beat well. Drop dough by teaspoonfuls onto greased baking sheets. Bake at 375 degrees (moderate oven) about 15 minutes Makes about 3 dozen cookies.

BUTTERSCOTCH SANDWICH COOKIES

- ¾ cup (1½ sticks) butter
- 1¼ cups firmly packed light brown sugar
- 1 egg
- 1 teaspoon vanilla
- 1¾ cups sifted regular all-purpose flour
- 2 teaspoons baking powder
- ¼ teaspoon salt
- ½ cup chopped nuts
- Browned Butter Filling

In a mixing bowl cream butter, gradually add sugar and beat until light and fluffy. Beat in egg and vanilla. Sift together flour, baking powder

For the Farm Wife and Family

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

THOMAS

Safety A Good Habit

Practice safety until it becomes a state of mind

Turn cooking utensil handles in from stove and table edges.

Unload guns before bringing them into your home and store them in locked cases or out of the reach of children.

Store lye, bleach, cleaning compounds, and similar supplies completely out of the reach of children

Know how to shut off gas, water, and electricity

Dry hands thoroughly before connecting or disconnecting electrical equipment

Provide ventilation in any room where portable gas or oil heaters are used.

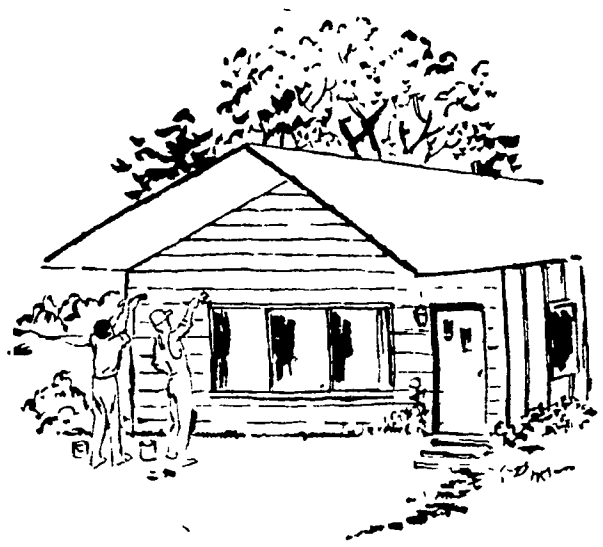
Provide competent supervision for children every time you leave home.

Have a plan of action in case of fire at night

Talk about how to prevent accidents when you discuss accidents that have happened

Look for hazards as you go about your daily work, making safety a part of your activities everyday.

(Continued on Page 19)



A HOME IMPROVEMENT LOAN

to modernize or enlarge your present home often is a better investment than buying another home. This is particularly true if you have purchased your home during a reduced market and bought "at a good price". Possibly your home is in an area from which you do not want to move. Get the BIG silo unloader value!

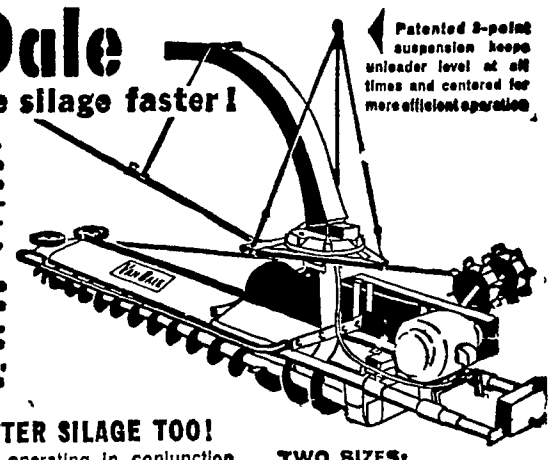
VanDale

Delivers more silage faster!



- Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.
- Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.
- Patented 3-point suspension keeps unloader level at all times and centered for more efficient operation.

DELIVERS BETTER SILAGE TOO!

The double augers, operating in conjunction with the patented V-paddle impellers, *digs* the silage, mixes it thoroughly, and then *throws* it down the chute. Your cows and cattle get good, palatable silage . . . not a powdered mash as often happens with unloaders using blowers.

TWO SIZES:

Standard—for silos 10' to 16'

Heavy Duty—for silos 18' to 30'

April, 1966

$9 Million To Revamp Farm Show—State agriculture secretary Leland H Bull revealed plans Thursday (Apr 7) for completely remodeling the Pennsylvania Farm Show complex

The project which would eventually replace all buildings but the large arena, is estimated at nine million dollars over the next four years The Secretary noted that even if the State Planning Board and the Legislature approve the allocation immediately, the first building will not be built in less than four years, and the second in six to eight years.

Solanco Procedures Team On Its Way—The Solanco Chapter parliamentary procedure team of Future Farmers of America moved one step closer to its second state title Wednesday (Apr 27) by defeating the best competition in southeastern Pennsylvania.

The event, featuring winning teams from the four southeast districts, saw the Solanco parliamentarians move from second place at the county level to their present top position under the coaching of agriculture instructor William Fredd

The Solanco boys aspiring to bring the state title back to Lancaster County are: Preston LeFevre, William Frey, David DeLong, Earl Wenger, Gary Craig, James Huber, Edward Kreider, and Richard Smith They will meet the other winning regional teams at Penn State University in June

Extension Assn. Adds Six Directors—In accordance with a by-law change approved at its annual meeting last February, the board of directors of the Lancaster County Agricultural and Home Economics Extension Association added six new directors. The board now numbers 21 members

The new appointees, according to M M Smith, Lancaster County agricultural agent, are (three-year terms), Mrs Arlene Witman, Mount Joy R2, and V Lester Schreiber, New Holland, (two year terms), Mrs Robert Gregory Lititz R1, and Stanley Musselman Lancaster, (one-year terms), Mrs Joseph Breneisen Conestoga R1, and Harry K Gerlach, Lancaster

Governor Promises Action On Agriculture — At his second annual conference on agriculture Tuesday (Apr 19), Governor William W Scranton renewed his commitment to the growth and betterment of Pennsylvania agriculture

He accepted the report of the committee on agriculture, which he established one year ago, and thanked the members for their dedicated efforts

Scranton instructed state agriculture secretary Leland H Bull to begin an immediate, detailed study of the recommendations "so that specifics may be implemented without delay"

One report of particular significance was presented by Amos H Funk of Millersville R1 In reporting on "Competition for Rural Resources", Funk pointed out that Pennsylvania is losing 15,000 acres of prime farmland each year to the forces of urbanization

"Current inventory shows we have a bit more than three million acres of cropland and pastures in Class I and Class II land. This (level) cannot be greatly reduced if more food is to be produced," Funk cautioned.

Funk noted that, projecting the present rate of land competition over the next 20 years, farmers can expect to see 14 million more acres tied up in urban areas, highways, and recreational uses. He stressed the urgency of considering Class III and Class IV land for as much of that use as possible.

The Governor also heard reports on Business and Credit, Educational Needs, Production and Marketing, and Governmental Environment.

ONE YEAR AGO

made at Penn State University under contract with his department. He estimated that, if successful, it could save Pennsylvania poultrymen $4 million a year.

Most of the research will be basic in nature, and will run for at least three years, Bull noted.

Create a desire for quality by an appeal to pride.

Five Years Ago

April, 1962

IRS Nixes Ag. Center Deductions—Plans for the solicitation of funds for the proposed Lancaster County Agricultural Center will be delayed indefinitely since the project, in its present concept of organization, does not permit gifts to be tax-deductible for federal income tax purposes, directors of the organization announced this week (Apr 7).

The Internal Revenue ruling did not question either the merits or the need of such a center, board president Willis Z Esbenshade explained. It simply means the present structure of organization must be modified to meet the requirements of a tax-exempt cause, he added.

* * * *

County FFA Wins Area Speaking and Procedures — Lancaster County Future Farmers made a clean sweep of the York - Lancaster area public speaking and parliamentary procedures contests Tuesday night (Apr 10).

A team of eight parliamentarians from the Garden Spot Chapter at Lampeter-Strasburg High School out-pointed five other teams from the two-county area to advance to the regional contest to be held next month.

Members of the winning team are: Kenneth Denlinger, Paul Welk, Kenneth Meck, James Shertzer, James Houser, Melvin Breneman, Earl Livingood, and Donald Kraybill.

In the public speaking contest, Kenneth Martin, a sophomore from the Grasslands Chapter at New Holland, was top scorer He was followed by Donald Kraybill of Garden Spot Chapter, second, David Graybill, Manheim, third; and Robert Wenger, Solanco, fourth.

* * * *

DHIA Tester Honored—Wilbur Houser, Lampeter, has been named Pennsylvania's outstanding Dairy Herd Improvement Assn supervisor. The honor was presented to the Red Rose DHIA tester at the annual meeting of Pennsylvania DHIA supervisors last week (Apr. 14).

In being named "Outstanding Supervisor", Houser was commended for his accuracy He has not had a report returned for corrections in two years

This marked the first time a Lancaster County tester had won the coveted state award.

County Boy Cited By Breed Assn. — Donald B. Trimble, Quarryville, Pennsylvania's champion Holstein Boy, was one of four finalists in a national contest conducted by the Holstein-Friesian Association of America.

During eight years of 4-H and FFA dairy work, Trimble built a herd of 22 registered Holsteins valued at $9250.

Since graduating from Solanco High School in 1960, he has been farming alfalfa, corn, and barley on a rented 60 acres in addition to his dairy and hog feeding operations.

General Mills Quits Feed Business — After 33 years of operation, General Mills is getting out of the livestock feed manufacturing business

In making the announcement, E. W. Rawlings, president, noted the company is selling its plants because of what he termed "sizable losses" due mainly to the company's broiler and turkey production contracts.

Ten Years Ago

April, 1957

County Girls In Milkmaid Contest — Seven Lancaster County dairymen's daughters have entered the second annual "Miss Milkmaid" contest.

They are Misses Dorothy Elmer, Lancaster R6; Marion Wolf, Denver R2; Janet Risser, Holtwood R1; Barbara Hoffmeier, Gap R2; Thelma Welk, Holtwood R2; June Long, Peach Bottom; and Ramona R. Groff, Lititz R4.

They will be among 105 young women from the state's 12 major milk-producing areas competing for the title this month.

* * * *

Swine Producers Assn. Planned — The Lancaster County Swine Producers Association will become a reality later this month when a countywide meeting of producers will elect a board of directors for the new organization.

Groundwork for the association was laid Monday night (Apr. 15) when a committee of ten swine producers met with county agent Max M. Smith to discuss formation of the association.

In addition to suggesting feeder pig and bred gilt sales, and educational meetings, as possible association projects, the group selected J. Lloyd Rohrer, Lancaster R7, Kenneth Skiles, Narvon R2, and Arlie Anderson, Elizabethtown to a nominating committee to choose candidates for a board of directors.

* * * *

Farmers Attend Haymaking Meeting — Eighty-eight county farmers spent half a day Tuesday (April 9) attending two quality hay meetings sponsored by the extension service.

The morning meeting was at the Robert Kauffman farm near Landisville. The afternoon session was at the Gordonville R1 farm of Donald S. Eby.

Various methods of drying hay by heated and unheated air were discussed.

Joe McCurdy, PSU extension agricultural engineer, said that longtime weather records in Lancaster County show that 12 days of rain can be expected in June. "This means a day of rain about every second or third day," he noted.

He recommended hay coming to the barn for air drying when it has about 40 percent moisture, and the making of short bales when the hay is to be barn dried.

* * * *

Shreve, New Stock Yard Pres. The new president of the Lancaster Union Stock Yards Co. is James D. Shreve, Neffsville. He succeeds the late David E. Longacre of Philadelphia, who died March 19.

Shreve will continue to serve as general manager for the yards.

F. M. Campbell of Salem, Ohio, was elected to the board of directors and was named vice president H V. Sheetz, Plainfield, N.J., was elected treasurer.

* *

NEPPCO Pres. Speaks At Booster Banquet — Harold P Klahold, president, Northeastern Poultry Producers Council, speaking at a $25 a plate booster banquet at Mount Joy Wednesday night (April. 17), congratulated area poultrymen on their self-help project to boost their industry.

Klahold reported on an opinion survey conducted by NEPPCO which showed that over 43 percent of 4000 questionaires returned indicated favoring a free market system for the industry, and two-thirds favored a very minimum of government intervention.

Integration, the survey showed, found few followers — only 1½ percent.

York County Holstein Hits ½-Ton Butterfat

A yearly production record exceeding a half-ton of butterfat has been completed by a registered Holstein cow, Sinking Springs Joe Sal, owned by Sinking Springs Farm, Inc., York.

The Pennsylvania Holstein's official record of production totaled 27,650 pounds of milk and 1,036 pounds of butterfat in 333 days. She started her lactation at the age of five years and 10 months and was milked two times daily.

● **River Basin**
(Continued from Page 13)

Dillsburg, White said that the "compact is loaded against Pennsylvania's interests and unfortunately few people have taken the effort to examine the contents."

"I'm certain," concluded White, "that Senator Confair will reexamine the compact in light of the discriminatory section giving preferential treatment to the federal government.

● **Deer Damage**
(Continued from Page 13)

He said foraging deer strip farmers' fields of alfalfa, corn and other grain The foraging is worse in drought years when deer go more frequently to cultivated fields for food, he noted

Bull advised farmers to contact their legislators to see what can be done by the Pennsylvania Department of Agriculture to help with this deer problem

(Continued from Page 15)

and salt. Add to creamed mixture. Stir in nuts. Shape into long rolls. Wrap in waxed paper and chill in the refrigerator. Slice about ⅛-inch thick; transfer to baking sheet; bake 8-10 minutes in preheated 375 degree oven. Cool on wire rack. Spread one cookie with Browned Butter Filling*; top with a second cooky. Makes 2 dozen cookies.

***BROWNED BUTTER FILLING**

2 tablespoons butter
1 cup sifted confectioners sugar
½ teaspoon vanilla
1 tablespoon light cream

In a 1-quart saucepan heat butter over low heat, stirring occasionally, until light amber color. In a small mixing bowl beat together butter and one-half of the confectioners sugar. Add vanilla and cream; then add remaining sugar and beat until smooth.

CHOCOLATE DROP COOKIES

½ cup (1 stick) butter
1 cup firmly packed light brown sugar
1 egg
1 teaspoon vanilla
2 cups sifted regular all-purpose flour
½ teaspoon baking soda
¾ cup milk
2 squares (2 oz.) unsweetened chocolate, melted
½ cup chopped nuts

Cream together butter and sugar until light and fluffy; add egg and beat thoroughly. Add vanilla. Sift together flour and baking soda; add alternately with milk to creamed mixture beginning and ending with dry ingredients. Blend in chocolate; then nuts. Drop by tablespoonfuls onto buttered baking sheet; bake in preheated 350 degree oven 10-12 minutes. Remove to wire racks to cool. When completely cool frost with Chocolate Confectioners Icing*. Yield: approximately 5 dozen.

***CHOCOLATE CONFECTIONERS ICING**

2½ cups confectioners sugar
¼ cup cocoa
2 tablespoons butter, softened
½ teaspoon vanilla
4-5 tablespoons milk

In a mixing bowl blend sugar and cocoa. Beat in butter and vanilla; gradually add milk and beat until light and fluffy. Yield: 1½ cups.

PEANUT CHOC-OAT CHEWS

1½ cups rolled oats
1 14-oz. can (1¼ cups) sweetened condensed milk
1 teaspoon vanilla
½ teaspoon salt
1 6-oz. pkg. (1 cup) semi-sweet chocolate chips
½ cup chunk-style peanut butter

Combine rolled oats, sweetened condensed milk, vanilla and salt in bowl and mix well. Add chocolate chips, and peanut butter and stir to blend. Press into greased 8-inch square pan Bake at 350 degrees for 30 minutes Cool and cut into 1¼ inch squares. Makes 3 dozen.

● Have You Heard

(continued from page 15)

Kitchen Arrangement Affects Working Capacity

The arrangement of equipment, cabinets, and counterspace influences your working capacity in the kitchen. Here are some ideas to keep in mind when planning a kitchen.

–Keep in mind walking, reaching, and stooping done in preparing meals and cleaning up.

–Counterspace for work to be done should be located where the fewest steps and motions are needed.

–Consider the amount of storage space and internal arrangement of that space used for equipment and supplies.

RAISIN BRAN BUTTER COOKIES

1 cup soft butter or margarine
1 cup sifted confectioners sugar
¼ teaspoon salt
1½ teaspoons vanilla flavoring
1½ cups sifted regular all-purpose flour
2 cups raisin bran cereal

Beat butter and sugar together until light and fluffy. Add salt, vanilla and flour; mix well. Stir in raisin bran. Drop by tablespoonfuls onto ungreased cookie sheets. Bake in moderate oven (375 degrees) about 15 minutes or until lightly browned. Makes about 3 dozen cookies.

Plant Breeder Advises Farmers On Conducting Own Corn Trials

"The only good corn hybrids are the ones that give you high yields The hybrid that produces 200 bushels per acre somewhere else isn't worth a lead nickel to you if it doesn't produce high yields on your land," an agronomist recently stated.

How do you find out which hybrids are best for you? One way is to run your own hybrid corn trials, says Dr R. H. Cole, chairman of the department of agronomy at the University of Delaware

Cole says good advice on running your own corn trials was reported by William D Pardee, Cornell University plant breeder, in March, 1967, Crops and Soils magazine Pardee recommends testing only four to six hybrids at a time: choose varieties that look good in nearby experiment station trials or those your neighbors are excited about The plot for each hybrid should be at least four rows wide by several hundred feet long Don't be tempted to compare big blocks planted to each hybrid, Pardee cautions Differences due to soil variation often can be greater than the differences between the varieties you are testing

Plant all hybrids the same day in the same way, use equal rates of fertilizer and the same herbicides If your field slopes, run your plots up and over the slope so that each hybrid has an equal chance to grow on low and high ground In short Pardee writes, treat the plots alike in every way so you can measure differences between varieties, not differences in handling

How can you tell whether *the differences you get are actual differences due to soil or other variations?*

Your best bet is to run duplicate tests in several fields, and then figure average yields for each hybrid If the hybrids rank the same in each test—then a five bushel difference may be enough to indicate an economically significant difference between these hybrids

If the hybrids rank differently between fields, with one hybrid tops in one field but only middling in another, then look for at least 10 bushels yield before deciding that one difference in overall average hybrid is better than another, Pardee advises.

It your tests don't look at all alike from field to field, with a test-topper in one field hitting bottom in another, and no apparent similarity—then look for at least 15 bushels difference in average yield before you decide you've measured a difference that's economically significant, the plant breeder said.

This rule-of-thumb guide differs from the precise statistical significance computed by experiment stations for their tests Still, it gives a rough approximation of how good the testing effort was, how reliable the results were, and how many bushels difference needed before gambling that one hybrid is better than another, he concluded.

A story from New Dehli says marauding elephants have become a major problem They are also upsetting a major political group in this country
